MINISTRY OF DIGITAL ECONOMY AND SOCIETY	Daily Weather Forecast Distribution Monday 19 October 2026 Issued at 1100 LST

General Situation

The monsoon trough lies across the Gulf and the middle South while the high-pressure system from China covers the upper North, the upper Northeast of Thailand and the South China Sea leading to the easterly wind prevails over Thailand and the Gulf. Continuous rain with isolated heavy to very heavy rain are forecat in the East and the South while isolated heavy rain in the Central including Bangkok and vicinity.

People are advised to closely monitor weather forecasts and people in the affected areas should beware of gusty wind and heavy to very heavy rains and accumulated rainfall that may cause flash floods, overflows and landslides especially along the waterways near foothills and lowlands.

In the Andaman Sea and the Gulf, the waves will be higher than 2 meters high in thundershower areas. All ships should keep off thundershowers.

In addition, during 21–25 October 2026, rainfall will increase, bringing isolated heavy to very heavy rains along with gusty winds to the lower Northeast, the Central region including Bangkok and vicinity, the East, and the upper South.
