

Weather Forecast Division  
Thai Meteorological Department

Medium Range Forecasts  
Weather Outlook During 2 – 8 Jul 2024

**Weather Forecast: During 2 – 3 Jul**, the southwest monsoon prevailing over the Andaman Sea, Thailand and the Gulf while the low pressure cell covers upper Vietnam. Thundershowers are likely in the country with isolated heavy rain remains in the Northeast.

**During 4 – 8 Jul**, the monsoon trough will lie above the North and the Northeast into the low pressure cell over upper Vietnam while the southwest monsoon still prevailing over the Andaman Sea, Thailand and the Gulf is strengthening. More rain is forecast over the country with isolated heavy rain in the North, the Northeast, the East and the South.

The moderate wind force the wave in the Andaman Sea and the Gulf up about 1 meter and above 2 meters in thundershowers

**Warning: During 4 – 8 June**, people in the North, the Northeast, the East and the South should beware of heavy rains and accumulations that may cause flash flood and runoff, especially along foothills near waterways and lowlands. All ships in the Gulf and the Andaman Sea should proceed with caution and keep off thundershowers **throughout the period**.
