

Weather Forecast: During 25 - 28 Mar, the heat low-pressure cell covers upper Thailand with hot to very hot and haze during the day. Meanwhile, **during 25 – 26 Mar** the southwesterly and southeasterly winds prevail over the upper country with isolated thundershower and gust. **During 29 - 31 Mar**, the weak high-pressure system from China will extend to the Northeast of Thailand and the South China Sea leading to the easterly and southeasterly winds bring the moisture from the South China Sea and the Gulf to the upper country where hot to very hot weather occurs. Outbreaks of summer storms are possible following with thunderstorms, gusty wind and hail including lightning strike are likely in some areas of the North, the Northeast, the Central including Bangkok and its vicinity and the East regions.

For the South, during 25 - 29 Mar, the easterly wind prevails over the Gulf, the South and the Andaman Sea with isolated thundershowers. The weakening wind and waves in the Gulf and the Andaman Sea are likely about 1 meter high and above 1 meter high in thundershowers. **During 30 - 31 Mar**, the easterly wind prevailing over the Gulf, the South and the Andaman Sea is strengthening with more rain. The strengthening wind forces the waves in the lower Gulf up to 1 - 2 meters high and above 2 meters high in thundershowers while about 1 meter high in the upper Gulf and above 2 meters high in thundershowers.

Warning: During 25 – 28 Mar, people should keep healthy due to hot to very hot weather and beware of thundershowers with gust. **During 29 - 31 Mar**, people in the upper country should keep healthy due to changeable weather and beware of severe conditions by keeping off outdoor places, big trees and unsecured billboards and farmers should prevent for crops damage and animals danger. All ships in the Gulf should proceed with caution and keep off thundershowers.
