
	<p style="text-align: center;">Weather Forecast Division Thai Meteorological Department</p>	<p style="text-align: center;">Medium Range Forecasts Weather Outlook During 29 May – 4 June 2025</p>	
<p>Weather Forecast: During 29 - 30 May, the weakening monsoon trough will lie across the North, the upper Northeast of Thailand and Laos to the low pressure which cover over the coast of Vietnam with isolated heavy rains are likely in the upper country and isolated very heavy rains are likely in the North and the Northeast. The moderate southwest monsoon prevails across the Andaman Sea, the South and the Gulf. The wind and waves in the upper Andaman Sea up to 2 meters high, the lower Andaman Sea are likely 1 – 2 meters high, the Gulf are likely about 1 meter high and above 2 meters high in thundershowers.</p> <p>During 31 May – 4 Jun, the southwest monsoon prevailing over the Andaman Sea, Thailand and the Gulf will weaken while the low pressure will cover over upper Vietnam. Less rain with isolated heavy rain are forecast over the country. The wind and waves in the Andaman Sea up to 1 - 2 meters high, the Gulf are likely about 1 meter high and above 2 meters high in thundershowers.</p> <p>In addition, during 29 – 30 May, the active low pressure cell over the upper Bay of Bengal will weaken with no direct effect to Thailand.</p>			
<p>Warning: During 29 – 30 May, people in the upper country should beware of heavy rains and accumulation that may cause flash floods and overflows, especially along the waterways near foothills and lowlands. Farmers should prevent for crops damage.</p> <p>All ships in the Andaman Sea and the Gulf should proceed with caution and keep off thundershowers throughout the period.</p>
