
	Weather Forecast Division Thai Meteorological Department	Medium Range Forecasts Weather Outlook During 12 - 18 Dec 2025	
<p>Weather Forecast: During 12 – 13 Dec, the moderate high-pressure system covering upper Thailand will weaken. An increase in temperatures with morning fog are likely in the upper country while morning cool to cold is possible in the upper North and the upper Northeast regions. At the same time, the easterly wind will bring the moisture to upper Thailand with isolated rains/thundershowers in the upper country. During 14 – 16 Dec, another high-pressure system from China will extend to upper Thailand with a decrease in temperature and strong wind. A decrease in temperature by 3 – 5 °C is likely in the Northeast while a decrease in temperature by 2 – 4 °C is likely in the North, the Central and the East regions. During 17 – 18 Dec, the moderate high-pressure system covering upper Thailand will weaken. An increase in temperatures with morning fog are likely in the upper country while morning cool to cold is possible in the upper country.</p> <p>For the South, during 12 – 13 Dec, the low-pressure cell covers the lower South with more rains and scattered heavy rains to isolated very heavy rains in the South. During 14 – 18 Dec, the northeast monsoon prevailing over the Gulf and the South will strengthening with continuous rainfalls in the South. The rather strong wind forces the waves in the lower Gulf up to be 2 – 3 meters high and above 3 meters high in thundershowers. In the upper Gulf, the waves are expected about 2 meters high and above 2 meters high in thundershowers. In the Andaman Sea, the waves are expected 1 - 2 meters high and above 2 meters high in thundershowers and offshore.</p>			
<p>Warning: People in the upper country should keep healthy due to variable weathers throughout the period.</p> <p>During 12 – 16 Dec, people in the upper country should beware of thundershowers and all farmers should prevent for crop's damage. People in the South should beware of heavy to very heavy rains and accumulated rains that may cause flash flood and overflows, especially along the waterways near foothills and lowlands. All ships in the Gulf and the Andaman Sea should proceed with caution and keep off thundershowers.</p>			
The weather forecast is valid from Friday this week until Thursday next week			
North	<p>During 12 – 14 Dec, morning cool. Isolated to scattered thundershowers. Minimum temperature 17 – 23 °C. Maximum temperature 29 – 34 °C. Cool to very cold on the mountain top. Minimum temperature 6 - 18 °C. Easterly winds 10 – 15 km/hr.</p> <p>After that, during 15 – 18 Dec, cool to cold with strong wind and 2 – 4 °C drop in temperature. Minimum temperature 13 – 20 °C. Maximum temperature 25 – 30 °C. Cold to very cold on the mountain top. Minimum temperature 4 - 15 °C. Northeasterly winds 10 – 25 km/hr.</p>		
North eastern	<p>During 12 – 13 Dec, morning cool. Isolated rains/thundershowers. Minimum temperature 18 – 23 °C. Maximum temperature 29 – 34 °C. Cool to cold on the mountain top. Minimum temperature 11 - 17 °C. Northeasterly winds 10 – 20 km/hr.</p> <p>During 14 – 18 Dec, cool to cold with strong wind and 3 – 5 °C drop in temperature. Minimum temperature 12 – 18 °C. Maximum temperature 26 – 30 °C. Cold to very cold on the mountain top. Minimum temperature 7 - 14 °C. Northeasterly winds 15 – 35 km/hr.</p>		
Central	<p>During 12 – 14 and 17 – 18 Dec, morning cool and light fog with 1 - 2°C rise in temperature. Isolated rains/thundershowers during 12 - 13 Dec. Minimum temperature 20 – 24 °C. Maximum temperature 30 – 34 °C. Easterly winds 10 – 20 km/hr.</p> <p>During 15 – 16 Dec, morning cool with strong wind and 2 – 4 °C drop in temperature. Minimum temperature 16 – 22 °C. Maximum temperature 28 – 32 °C. Northeasterly winds 10 – 30 km/hr.</p>		
Eastern	<p>During 12 – 14 and 17 – 18 Dec, morning cool and light fog with 1 - 2°C rise in temperature. Isolated rains/thundershowers during 12 - 13 Dec. Southeasterly winds 15 – 35 km/hr. Wave height about 1 meter, 1 - 2 meters offshore and above 2 meters high in thundershowers. Minimum temperature 19 – 25 °C. Maximum temperature 31 – 34 °C.</p> <p>During 15 – 16 Dec, morning cool with strong wind and 2 – 4 °C drop in temperature. Northeasterly winds 20 – 35 km/hr. Wave height about 1 meter and about 2 meters offshore. Minimum temperature 17 – 23 °C. Maximum temperature 29 – 32 °C.</p>		
Southern (East Coast)	<p>During 12 – 13 Dec, scattered to fairly widespread thundershower and scattered heavy rains to isolated very heavy rains in the middle and lower part. Chumphon upwards: northeasterly winds 15 - 35 km/hr. Wave height 1 - 2 meters and about 2 meters high in thundershowers. Surat Thani downwards: northeasterly winds 20 - 35 km/hr. Wave height about 2 meters and above 2 meters in thundershowers.</p> <p>During 14 – 18 Dec, scattered thundershower and scattered heavy rains in the lower part. Nakhon Si Thammarat upwards: northeasterly winds 20 - 35 km/hr. Wave height about 2 meters and above 2 meters high in thundershowers. Songkhla downwards: northeasterly winds 20 - 40 km/hr. Wave height 2 - 3 meters and above 3 meters in thundershowers. Minimum temperature 19 – 26 °C. Maximum temperature 28 – 34 °C.</p>		
Southern (West Coast)	<p>During 12 – 13 Dec, scattered thundershower and isolated heavy rains.</p> <p>During 14 – 18 Dec, isolated to scattered thundershower and and isolated heavy rains in the lower part. Easterly winds 20 – 35 km/hr. Wave height 1 - 2 meters and above 2 meters in thundershowers and offshore. Minimum temperature 21 – 25 °C. Maximum temperature 28 – 34 °C.</p>		
Bangkok Metropolitan Region	<p>During 12 – 14 and 17 – 18 Dec, morning cool and light fog with 1 - 2°C rise in temperature. Isolated rains/thundershowers during 12 - 13 Dec. Minimum temperature 21 – 24 °C. Maximum temperature 31 – 34 °C. Southeasterly winds 10 – 20 km/hr.</p> <p>During 15 – 16 Dec, morning cool with strong wind and 1 – 3 °C drop in temperature. Minimum temperature 19 – 23 °C. Maximum temperature 29 – 32 °C. Northeasterly winds 10 – 30 km/hr.</p>
