Daily Weather Forecast Distribution
On Wednesday 23 April 2025
Time Issued 2300 LST

General Situation

The heat low pressure cell covers over the upper Thailand with hot to very hot during the day. Meanwhile the southerly and southwesterly winds prevail over upper Thailand with isolated thundershowers and gusty winds. People in the upper country should keep healthy due to hot to very hot weather and beware of severe conditions with gusty winds.

The southwesterly and southeasterly wind prevails over the gulf, the South and the Andaman Sea with isolated heavy rains. The wind and waves in the Andaman Sea are likely about 1 meter high and above 2 meters high in thundershowers. All ships in the Gulf and the Andaman Sea should keep off thundershowers.

In Addition, during 26-29 Apr, the moderate high-pressure system from China will extend to cover Vietnam and the South China Sea. There will be confluence of southeasterly and southwesterly winds prevail over the upper country while there are hot to very hot weather. Outbreaks of summer storms are possible following with thunderstorms, gusty wind, hail including lightning strike and heavy rains in some areas.
