Daily Weather Forecast Distribution

On Friday 15 August 2025

Time Issued 0500 LST

General Situation

The monsoon trough lies across the upper North into the low pressure cell over upper Vietnam while the southwest monsoon prevailing over the Andaman Sea, Thailand and the Gulf is strengthening. Isolated heavy rains are likely in the country while isolated very heavy rains are in the East and the South (west coast). People in these areas should beware of heavy to very heavy rains and accumulation that may cause flash flood and overflows, especially along the waterways near foothills and lowlands.

The rather strong wind force the waves in the upper Andaman Sea up to 2-3 meters high and above 3 meters high in thundershowers. In the Gulf and the lower Andaman Sea, the wave are likely about 2 meters high and above 2 meters high in thundershowers. All ships in the Andaman Sea and the Gulf should proceed with caution and keep off thundershowers. Small boats in the upper Andaman Sea should keep ashore.

Weather Forecast for Thailand from 6.00 a.m. Friday to 6.00 a.m. Saturday

<u>North</u>	Scattered thundershowers and isolated heavy rains in Nan, Phrae, Uttaradit, Phitsanulok and Phetchabun. Minimum temperature 23-26 °C Maximum temperature 32-35 °C Southwesterly winds 10-15 km/hr.
