Daily Weather Forecast Distribution
On Thursday 4 September 2025
Time Issued 0500 LST

General Situation

The monsoon through lies across the upper North and the Northeast while the moderate southwest monsoon prevailing over the Andaman Sea, Thailand and the Gulf with isolated heavy rain in Thailand. People in these areas should beware of heavy rain and its accumulation that may cause flash floods and overflows especially along the waterways near foothills and lowlands.

The moderated wind forces the waves in the upper Andaman Sea up to about 2 meters high and above 2 meters high in thundershowers. In the lower Andaman Sea and the upper Gulf, the waves are likely 1-2 meters high and above 2 meters high in thundershowers. All ships should proceed with caution and keep off thundershowers.
