Daily Weather Forecast Distribution

Thursday 18 September 2025

Issued at 1700 LST

General Situation

The monsoon trough lies across the Central, the East and the lower Northeast into the active low-pressure cell over the South China Sea while the moderate southwest monsoon prevailing over the Andaman Sea, the South and the Gulf will strengthen. Isolated heavy rain are likely in the country while isolated very heavy rain are possible in Bangkok and vicinity including the East. People in these areas should beware of heavy to very heavy rain and its accumulation that may cause flash flood and overflows, especially along foothills near waterways and lowlands.

The wind and waves in the upper Andaman Sea and the upper Gulf are likely about 2 meters high, the lower Andaman Sea, the waves are likely 1-2 meters high and above 2 meters high in thundershowers. All ships should proceed with caution and keep off thundershowers.

In addition, a tropical depression over the upper South China Sea is intensified to a tropical storm "MITAG". This storm is expected to make landfall over South of China during 19–20 Sep with not approaching Thailand. The travelers should check the weather forecast for the region you're going to be visiting.
