Daily Weather Forecast Distribution

Friday 12 December 2025

Issued at 1100 LST

General Situation

The low-pressure cell covers the lower Gulf and the lower South while the moderate northeast monsoon prevails over the upper Gulf, the upper South and the upper Andaman Sea. Scattered heavy to isolated very heavy rains are forecast in the South. The moderate wind and wave in the lower Gulf are expected about 2 meters high, 1-2 meters high in the upper Gulf and above 2 meters high in thundershowers. All ships should proceed with caution and keep off thundershowers.

The high-pressure system covers upper Thailand while the easterly and southeasterly winds prevail over the upper country with morning cool and isolated rains. People in the upper country should keep healthy due to changeable weather and all farmers should prevent for crop's damage.
