Daily Weather Forecast Distribution

Friday 12 December 2025

Issued at 2300 LST

General Situation

The low-pressure cell covers the lower Andaman Sea while the moderate northeast monsoon prevails over the upper Gulf, the upper South and the upper Andaman Sea. Isolated heavy rains are forecast in the South. The moderate wind and wave in the lower Gulf are expected about 2 meters high, 1-2 meters high in the upper Gulf and above 2 meters high in thundershowers. All ships should proceed with caution and keep off thundershowers.

The easterly wind prevails over the upper country while the westerly trough from Myanmar will move pass the upper North of Thailand and upper Laos with isolated thundershowers/rains in the upper country. At the same time, the high-pressure system covers upper Thailand and the South China Sea with morning cool. People in the upper country should keep healthy due to changeable weather and beware of thundershowers. All farmers should prevent for crop's damage.

In addition, another high-pressure system from China will extend to upper Thailand with a decrease in temperature and strong wind during 14–16 December 2025. A decrease in temperature by 3–5 °C is likely in the Northeast while a decrease in temperature by 2–4 °C is likely in the North, the Central and the East regions.

Weather Forecast for Thailand from Friday midnight to Saturday midnight

North	Morning cool. Scattered rain/thundershowers mostly in Mae Hong Son, Chiang Mai, Chiang Rai, Lamphun, Lampang, Phayao, Nan, Phrae, Uttaradit, Sukhothai, and Phitsanulok.
