Daily Weather Forecast Distribution  
Saturday 13 December 2025  
Issued at 0500 LST

General Situation

The low-pressure cell covers the lower Andaman Sea while the moderate northeast monsoon prevails over the upper Gulf, the upper South and the upper Andaman Sea. Thundershowers are forecast in the South. The moderate wind and wave in the lower Gulf are expected about 2 meters high, 1-2 meters high in the upper Gulf and above 2 meters high in thundershowers. All ships should proceed with caution and keep off thundershowers.

The easterly wind prevails over the upper country while the westerly trough from Myanmar will move pass the upper North of Thailand and upper Laos with isolated thundershowers/rains in the upper country. At the same time, another high-pressure system from China extend to southern of China, is expected to cover the Northeast of Thailand and the South China Sea by tomorrow (14 Dec 2025). After that, it is forecast to cover the rest regions except for the South by next period. People in the upper country should keep healthy due to changeable weather and beware of thundershowers. All farmers should prevent for crop's damage.
