Daily Weather Forecast Distribution
Wednesday 31 December 2025
Issued at 1100 LST

General Situation

The moderated high-pressure system from China covering upper Thailand and the the South China Sea is weakening while the northwesterly wind at the high-altitude prevails over the upper Thailand. Morning cool to cold is forecast in the upper North and the upper Northeast regions while morning cool with light fog are likely in rest regions with dense fog in some areas of the North and the Central. People in the upper country should keep healthy due to cool to cold weather and beware of fire due to dry air. All transport take more caution with poor visibility.

The weak northeast monsoon prevails over the lower Gulf and the lower South with isolated rains. The wind and waves in the lower Gulf are expected 1-2 meters high and above 2 meters high in thundershowers. People in the lower South should beware of thundershowers. All ships in the Gulf and Andaman Sea should proceed with caution and keep off thundershowers.
