Daily Weather Forecast Distribution

Friday 23 January 2026

Issued at 2300 LST

**General Situation**

The rather strong high-pressure system from China covers upper Thailand and the South with a decrease in temperature by 1-2 °C and strong wind. People should keep healthy due changeable weather.

The moderated northeast monsoon prevails over the Gulf and the South with isolated thundershowers in the South. The wind and waves in the lower Gulf are likely about 2 meters high, 1-2 meters in the upper Gulf and the Andaman Sea offshore, above 2 meters in thundershowers. All ships should proceed with caution.
