Daily Weather Forecast Distribution

Sunday 8 March 2026

Issued at 1700 LST

General Situation

The heat low pressure cell covers the upper country with the southerly and southeasterly winds bring the moisture from the South China Sea and the Gulf to upper Thailand where hot weather occurs. Isolated thundershower with gust are likely in the upper country. People in the upper country should beware of severe conditions and keep healthy due to hot weather.

The easterly and southeasterly wind prevails over the Gulf, the South and the Andaman Sea with isolated thundershowers in the South. The winds and waves in the lower Gulf are likely 1-2 meters high and above 2 meters high in thundershowers. All ships in the Gulf and the Andaman Sea should keep off thundershowers.

In addition, during 11-13 March 2026, the high-pressure system will cover the upper North, the Northeast and the South China Sea with the southerly and southeasterly winds cover the upper country where hot weather occurs. Outbreak of summer storms are possible with gust, lightning, hail and thunderstorms with heavy rains in upper Thailand.
