Daily Weather Forecast Distribution

Wednesday 15 April 2026

Issued at 0500 LST

General Situation

The heat low-pressure cell covers upper Thailand with day hot to very hot and haze over the upper country. Meanwhile, the southerly and southeasterly winds prevail over the Northeast and the East with isolated thundershower. People should keep healthy due to hot to very hot weather and beware of severe condition.

The westerly wind prevails over the Andaman Sea, the South and the upper Gulf while the southeasterly wind prevails over the lower Gulf with isolated thundershowers and day hot in the South.

In addition, During 16-20 April 2026, another high-pressure system from China will extend to the South China Sea leading to the southerly and southeasterly winds prevailing over the lower Northeast and the East will strengthen while hot to very hot weather occurs over the upper country. Outbreak of summer storms are possible following with thunderstorm, gusty wind and hail including lightning in some areas of the Northeast for the first period then the East, the eastern part of the Central and the lower North regions, respectively.
