Daily Weather Forecast Distribution

Wednesday 3 June 2026

Issued at 2300 LST

General Situation

The rather strong southwest monsoon prevails over the Andaman Sea, Thailand and the Gulf with more rain and isolated heavy rain are possible in the country mostly in the western part of the North and the Central regions while isolated very heavy rains are likely in the East and the South regions. People should beware of heavy to very heavy rains and its accumulation that may cause flash flood and overflows, especially along foothills near waterways and lowlands.

The rather strong wind forces the waves in the Andaman Sea and the upper Gulf up to be 2–3 meters high and above 3 meters high in thundershowers. All ships in the Andaman Sea and the Gulf should proceed with caution and keep off thundershowers, small boats in the Andaman Sea and the upper Gulf keep ashore.
