Daily Weather Forecast Distribution

Friday 7 August 2026

Issued at 0500 LST

General Situation

The monsoon trough lies across the upper North and the upper Northeast into the low-pressure cell over the Gulf of Tonkin while the rather strong southwest monsoon prevails over the Andaman Sea, Thailand and the Gulf. Isolated heavy rains are forecast in Thailand and isolated very heavy rains are possible in the North, the Northeast and the East regions. People should beware of heavy to very heavy rains and accumulation that may cause flash floods, overflows and landslides especially along the waterways near foothills and lowlands.

The rather strong winds force the waves in the upper Andaman Sea and the upper Gulf up to be 2–3 meters high and above 3 meters high in thundershowers. All ships should proceed with caution and keep off thundershowers, small boats in the upper Andaman Sea and the upper Gulf should keep ashore.

In addition, typhoon “DOLPHIN” over the Pacific Ocean is expected to move pass Okinawa Province, Japan during 6-7 Aug 2026 and it will make landfall over Zhejiang, China during 9-10 Aug 2026. This storm will not move to Thailand. The travelers should check the weather forecast for the region you're going to be visiting.

Weather Forecast for Thailand from 6.00 a.m. Friday to 6.00 a.m. Saturday

<u>North</u>	Fairly widespread thundershowers and isolated heavy rain in Mae Hong Son, Chiang Mai, Lampang, Phrae, Uttaradit, Sukhothai, Tak, Kamphaeng Phet, Phitsanulok, Phichit, and Phetchabun.
