Daily Weather Forecast Distribution

Tuesday 28 October 2025

Issued at 2300 LST

General Situation

The high-pressure system covers upper Thailand while an active low-pressure cell covers the coast of southern Vietnam. More rains are forecast in the upper country especially in the Northeast and the East regions while morning cool are possible in the North and the Northeast regions. People in upper Thailand should keep healthy due to changeable weather.

The monsoon trough lies across the middle with isolated heavy rains in the South. People in the South should beware of heavy rains. The moderate winds and waves in the upper Gulf and the upper Andaman Sea are expected 1-2 meters high and above 2 meters high in thundershowers. In the lower Gulf and the lower Andaman Sea, the waves are expected about 1 meter high and above 2 meters high in thundershowers.
