Daily Weather Forecast Distribution

Wednesday 29 October 2025

Issued at 0500 LST

General Situation

An active low-pressure cell covers the coast of southern Vietnam leading to the easterly wind bring the moisture to the upper country while the high-pressure system covering upper Thailand is weakening. More rains are forecast in the upper country and isolated heavy rains are possible in the Northeast region while morning cool are possible in the North and the Northeast regions. People in the upper country should keep healthy due to changeable weather.

The monsoon trough lying across the middle South is strengthening with more rains and isolated heavy rains in the South. People in the South should beware of heavy rains. The moderate winds and waves in the upper Gulf and the upper Andaman Sea are expected 1-2 meters high and above 2 meters high in thundershowers. In the lower Gulf and the lower Andaman Sea, the waves are expected about 1 meter high and above 2 meters high in thundershowers.
